

BIOFIELD TUNING

AFTER A BIOFIELD TUNING SESSION

Everyone is different and will have a unique experience of a Biofield Tuning treatment. Most people who receive Biofield Tuning sessions report feeling clearer, calmer, more relaxed, and more self-aware. Sometimes clients will experience a detox, which can vary greatly. Some clients have reported:

- Profound exhaustion and tiredness, needing to sleep or lay low for a day or more: generally, happens with people who have been 'running on empty'.
- Extreme emotionalism, or being very aware of formerly masked or buried emotions- crying a lot, or being very angry.
- Headaches and/or dizziness
- In very rare instances: skin rashes, mucus, fevers, vomiting, loose stools, excessive thirst

Generally, these symptoms are detoxification and pass within a day or two, but if a condition persists, it is important to see your therapist again - sooner than later. Sometimes people can get 'stuck' in the unwinding process and need an additional boost to complete the adjustments.

If you have any questions or concerns at all, please feel free to discuss these with your Biofield Tuner.

Hydrotherapy:

Hydrotherapy, in and out, is optimum after a sound therapy session. Drinking plenty of water and herbal teas after a session is recommended, and soaking in a mineral or epsom salt bath for 20 minutes minimum supports the body in detoxifying or releasing any physical components from the blockages released from the energy field. It is also beneficial to be well hydrated before a session due to the sound-conductive properties of water.

Grounding:

In climates that permit, it is highly recommended to spend some time walking barefoot outside in the grass or soil after your session. Connecting the bare feet to the earth will help to ground your energy, drawing excess energy down and out of the body, and drawing the earth's negatively charged ions up into the body. This helps create a state of electromagnetic equilibrium in the system that can potentially relieve a wide variety of discomforts.

Homework:

Becoming more well-balanced usually requires a change in perception and/or action of some kind or another. Simply becoming more aware of our habitual subconscious behaviors, becoming aware of ourselves from the place of 'the witness,' broadens the trajectory of our life possibilities.

Hence, we become more free to choose healthy and self-supporting behaviors.
